Experience

Front-End Developer - Stirling Technologies (May 2019 – present)

Translate hi-fi design comps into a functional UI by leveraging Bootstrap components/plugins || Standardized the architecture of front end code base || Refactor proprietary SCSS to follow BEM convention and reduce bloat

Front-End Developer - PTC Inc. (June 2017 – October 2018)

Translate wireframes into functional component prototypes || Collaborate within a cross-functional team of developers and designers || Mentor junior UX designers || Create requirements based on business needs and stakeholder requests || Lead developer on internal company style guide || Standardizing of PTC front-end coding conventions || Always UX first

Front-End Developer & Designer - Smart Destinations Inc. (June 2016 – June 2017)

Create and develop wireframes into PPC landing pages and UI templates || Perform A/B user testing on design prototypes || Collaborate directly with marketing teams and leadership to create, update/improve features || Design email layouts || Champion UX initiatives

UX Associate Front-End Developer - Constant Contact (January 2013 - February 2016)

Built functional POC prototypes for the next-gen UI on a cross-functional UX team || Built/maintained/ tested proprietary framework supporting over 600k users || Concentrated on reusable/extensible code leveraging modern front-end conventions || Maintained internal UI style guide
